TR : +90 536 486 87 86 (📞) FR : +33 6 95 83 72 07

egeeken.tr@gmail.com www.linkedin.com/in/TarikEgeEken

Website / Portfolio : egeeken.github.io

LANGUAGES

- English (🇬🇧): Fluent
- French (🇫🇷): Fluent
- Turkish (🇹🇷): Fluent

TECHNICAL SKILLS

Coding Languages

- Python (PyTorch, NumPy, Pandas, etc.)
- Java, C, C#, SQL, Shell, OCaml, GAML
- HTML, CSS, JS, Flask

Frameworks

- Ollama, Gradio, Scikit, Keras, LangChain
- GPT4All, ComfyUI (Stable Diffusion)

Software

- Microsoft Excel, LibreOffice Calc, Google Suite
- Unity, Godot
- Adobe Premiere Pro, After Effects, Edius
- Adobe Photoshop, Illustrator, DxO Photolab

OTHER SKILLS AND INTERESTS

I highly recommend you check out my portfolio: egeeken.github.io/portfolio

Artistic Skills

- Violin, I'm violin 1 in a symphony orchestra
- Piano, Drums, Music Theory
- Video Editing
- Photography, Photo Editing
- Drawing (Graphite), Painting (Watercolor)

Other Skills and Interests

- Chess (top 2.5% worldwide)
- Speed typing (top 0.3% worldwide)
- Scuba Diving (Certified CMAS 1* & PADI AOWD)

EDUCATION

2024-2026  SORBONNE UNIVERSITÉ

MASTER'S IN COMPUTER SCIENCE, SORBONNE UNIVERSITY
AI2D Program (Specializing in Artificial Intelligence)

2021-2024  SORBONNE UNIVERSITÉ

BACHELOR'S IN COMPUTER SCIENCE, SORBONNE UNIVERSITY

PROFESSIONAL EXPERIENCES

2025

OUTLIER AI

I refined LLM behaviour by providing high quality feedback and detailed corrections for RLHF as an Independent Contractor.

2019-2021

UMEDYA

I edited videos for high profile clients and events. Produced music, participated in on-site design, management and translation in events.

PROJECTS

Portfolio: egeeken.github.io/portfolio-CS

LOCALLY TRAINED LLM CHATBOT FROM SCRATCH

I built a complete chatbot model in PyTorch, modeled after the GPT2-Small (124M) architecture, optimized with better hyperparameters, AdamW, mixed-precision etc. Everything was done locally on my laptop, including generating a training dataset using Llama 3-8B as a supervised finetuning (SFT) pipeline for chatbot (input/output) format.

ACTIVE PERCEPTION USING VLM, ISIR

I did this project in the Institute of Intelligent Systems and Robotics under supervision of the director of the institute, Stéphane Doncieux. I applied multimodal language models to robotics tasks, evaluated and benchmarked various open source and SOTA models.

STUDENT ASSOCIATION ADMINISTRATOR, AMEVS

I managed the student association for music and charity that is the recipient of the 2024 Grand Prize for Access to Culture at the Institute of France, where we were awarded 100,000€ for the project. I planned rehearsals and participated in concerts for hundreds of spectators. Helped create and fund an ongoing youth orchestra in Haiti, giving thousands of children access to musical equipment and education.

PROBABILISTIC BRUSH COMPRESSION

I designed a new image compression algorithm and deployed a demo hosted on Hugging Face Spaces with an accessible Gradio interface.

MULTIMODAL CHATBOT VOICE INTERFACE

A voice/image interface for local vision language models like Llama3-vision, I built it using Gradio, FastRTC and Ollama.

BETA TESTING PARTICIPANT, DALL-E, Stable Diffusion

I assessed the quality of various AI image generators as part of an early access beta testing program.
